

文字记录：新录音 7 2026年9月18日

录音主题：Production Project Discussion

录音时间：2026年9月18日（周五） 19:58 - 20:27 （GMT+08）

智能纪要：[Production Project Discussion 2026年9月18日](#)

说话人 1 00:00:00

是自己承担的，我没看。

说话人 2 00:00:18

好的。

说话人 1 00:00:31

你要问这点零是什么问题？需要我回答吗？

说话人 2 00:00:35

Okay.And the last, I will talk about the passivation status of equipment and how it leads to the ongoing impurity investigations. So documentation review and approval. This will be.

说话人 2 00:01:05

So, for example, for L3, we give it there, but L3 part should be approved tonight.

说话人 1 00:01:35

搞定了吗？正在找这个位置。直接套耳放。已经听到了。你坐坐坐。

说话人 3 00:01:53

严总说他明天还安排在你公司。明天还加班啊？明天啊？咋了？他是他说现在就是事情有点多，所以他们明天还得安排有加班。说他吃饭，咱们再等等，再缓缓。

说话人 4 00:02:16

啊，行。

说话人 1 00:02:18

啊，明天周末，别让大家吃饭了，吃饭都属于加班了。

说话人 3 00:02:23

不是，你那天看，你就看了，你看到那个，就看咱，你别说咱市场，你看到那个郭师兄，我都觉得他有点。

说话人 3 00:02:44

对，所以，如果是那边，也确实是忙不过来，毕竟那么多事。

说话人 1 00:02:51

那跟跟不过来的。

说话人 4 00:02:53

Will know more, once we're actually in production, as to which steps plan ahead, hopefully we can head this. But yeah, I understand that need for notion. So I think we'll have to work together to make sure that we have access for the key, you know, key charges or key stuff. Sure. And again, so we encourage my last time communication channel.

说话人 2 00:03:25

So, GG 9,1,7, and Lara can go directly to the counterpart from with. So that's why they have our counterpart here. Providing a pip support.

说话人 1 00:03:44

然后完了之后，他当时是当时的文员。做当时的文员，生产部文员。然后当时做做陪谈嘛。做谈的时候，车间那边就没人嘛。要选一些那个。

说话人 2 00:04:44

No, for the question, then I'm gonna jump next to raw material. So the high level update of raw material for all L1, L2, and L3 raw material for the first and second PPP, right? Yes, I have. 5, on site.

说话人 3 00:05:02

又能干又能喝。

说话人 2 00:05:05

arriving, access, shortly after。

说话人 1 00:05:08

刚开始在招，在招。

说话人 2 00:05:09

and today will not be impact。

说话人 1 00:05:12

一个人就好。For GG 9,1,7.The reason for this, for the phone scale that will find the person.Alright, the reason, if you go back, just point the right schedule, right?So as of today, so that we can go back to ECM on the reason.

说话人 4 00:06:00

Be April twentieth.Correct.

说话人 2 00:06:03

Correct me if I' m wrong on that.

说话人 5 00:06:06

Yes.

说话人 1 00:06:09

OK, so it' s not on that yet.

说话人 1 00:06:12

然后我下到中间谈一下。

说话人 2 00:06:14

Thank you.

说话人 1 00:07:27

Okay, so maybe just to repeat. Okay, so we currently have site one full packed demo, and then October 20th, we're gonna get enough red.

说话人 1 00:07:39

昨天培训的时候，我都一再要求，消防消防里面现场录像。

说话人 4 00:07:49

Do we also have the filter cassettes? And what's the inventory picture?

说话人 1 00:07:55

而且，安全培训就是这种消防培训、安全培训当中不认真的人，这就是要建建黑名单。

说话人 2 00:08:01

是。

说话人 3 00:08:03

对，我看有个奖惩报给你，就是有一个人培训员。

说话人 1 00:08:10

睡着了还是怎么着？然后进行教育。培训期间是个很好的时机。

说话人 3 00:08:20

对，然后培训教育了他。

说话人 1 00:08:22

消防安全。

说话人 1 00:08:27

他们报给你的那个就是进行教育了，下午发现又给睡着了。

说话人 1 00:08:42

but we doing for all of them.

说话人 1 00:08:44

这种人就是。我们是要 allow, tracking for all wrong materials。在平均就百分之十，应该好的。

说话人 1 00:08:53

I think we can bring that into joint process team meeting just as an active update.

说话人 4 00:09:04

Face tested stages were released.

说话人 1 00:09:09

他另外一个呢，陈总，其实都是。

说话人 2 00:09:10

Yangbo is that ok?

说话人 1 00:09:14

就是这个。就是跟。

说话人 2 00:09:23

Then the last thing we're gonna talk about the ongoing impurity investigation. So for everyone, impurity, the good news now is the structure was confirmed by to the end of our, so I think, again, credit really to the work from Lily size on this. The impurity spiking in the first study have been complete. So below are the root cause, the possible mechanism that we hypothesis. I think the main proposed gap that would be on Lara Project SPS and clip, this equipment will undergo passivation.

说话人 1 00:10:08

The schedule has been shared by the moving team, and this will also have an impact on the initiation. I know the team are working hard on the investigation summary currently that kind of joins the created document that looks through all of the different experimental work that has been happening.

说话人 4 00:10:33

Think there are still some questions, but they need to follow up on that. We need to take out of this meeting that's being tracked to the investigation specific meeting. Just in terms of there

were some questions around TCA, around some of the income inspection, also around passivation plan for additional equipment. So looking at.

说话人 2 00:11:06

Yeah, I know there was an investigation call right before this. If I'm not mistaken.

说话人 5 00:11:15

Yeah, yes. So like Sherry, we may, every day we will have a teddy conference with the United States. Thank you so much for the help. Actually, you guys to the structure, which will help us a lot. So like Sherry mentioned, most of the report will be available this week.

说话人 2 00:11:37

And then my investigation report will be complete only next week and approve if after review post. And then the target approval and completion will be September 25th, so that will wrap up this investigation.

说话人 4 00:11:58

But that's just to follow up on those additional questions, just to make sure we are all confident that we, you know, complete, yeah, group calls and propose campus that were aligned how we can proceed to production starts. I think there are still some time questions, but I think the team are actually.

说话人 4 00:12:18

然后。

说话人 1 00:12:23

就是上周还是上上周啊？哎，就是就是。No.

说话人 4 00:12:26

I think the teams are progressing well with those, with the deviation progress in the campus. Just to be clear though, I do the campus need to be implemented prior to startup. So I know that the team will give more details and timing and what that looks like in a much more specific level here at this level and with this Group 2 around that piece?

说话人 2 00:12:49

Yeah, yeah, sure. Yeah, that's also align with our understanding is owner business. I may have to be complete prior to negotiation. And I think I'd like to understand, I don't know, I haven't been able to help the team. So apologies if you guys already had conversation, but if not, I would definitely.

说话人 1 00:13:08

like to understand it can be.

说话人 4 00:13:13

Procedures and also just equipment readiness, the past lack of capacity on support lines and tanks, I think it's probably very.

说话人 1 00:13:24

shocking us and concerning more holistically. so, wondering if you have。

说话人 4 00:13:30

And good visibility to the teams that had that conversation, because I appreciate the intent is to have everything passed on for our equipment. But to me, that really speaks to a system perspective that I'd like to understand.

说话人 2 00:13:44

15分钟搞定。

说话人 2 00:13:45

is we have QA online?

说话人 1 00:13:50

问答清单。

说话人 5 00:13:52

so actually。

说话人 1 00:13:56

他有专门这些审。

说话人 5 00:14:04

so actually we we were to discuss with the QA。 probably in the future we were to everything。

说话人 1 00:14:17

常见问题清单。thank you。that type of it。like to think about it。thank you。

说话人 1 00:14:28

而且在审计的时候都是。

说话人 2 00:14:31

Okay, then moving on to the China 1,7. So the root cause of the impurity is identify a acetal at a high introduction into the reaction system. So again, this is ongoing discussion with Lily team, but the below control strategy will be implemented. So we're looking into. Three specific.

说话人 1 00:15:00

然后呢？Area.我我也在观察，就说。

说话人 2 00:15:03

with。As you know, out of high in EPA solution, the water content coupling and the nitrogen purge flow rate and also again the passivation of the transfer line from our activation tank to the reactor and from the material DMF solution tank to this reactor will be also completed by September 21st. The investigation report will be available by September 25th, and the target date to closure, the investigation event will be by the end of September. So September 28.

说话人 2 00:15:42

业务所以这是 related to 17。

说话人 1 00:15:46

订单就行了，管那么多呢？陈总，我是实用主义。

说话人 5 00:15:50

Yes, thank you for this new period. We're kind of a very clear for that. So I think some of the magnesium is already part of the back end first discussion yesterday and any team. So we almost zero. So only the water content level of the water content is still defined for the range. So

everything so far is pretty clear. So which is defined, trying to define the range for content. So that I'm, after that, I also will decide whether to close to the investigation report. So actually the service you don't need team is still coming right now. So we're going to against this.

说话人 1 00:16:30

这个什么代码？

说话人 5 00:16:31

reporting。

说话人 1 00:16:31

这压力很大的，陈总。我记得我记得，这压力可大了。

说话人 6 00:16:38

Thank you, Jambo. Yeah, I think you covered the three kind of primary costs here, and it was the framework for mediation. Accordingly, there are some additional details to try talk through. Of course, we're at the GBT level, but we appreciate kind of the visibility here to those primary levers and visibility time as well.

说话人 2 00:17:03

So that actually is the last live. Again, we try to focus on the main topics and the most critical path from the JMT. I know we go a much large detail on everything else. But I would want to give the floor for everybody to see if we're missing any topic, anything other topic that we may want to share. But Raymond, any update on analytical? I know many of the report are with Lily for review. So how is that going? Do we need any attention from the group here?

说话人 5 00:17:41

So currently, all the animal documents are under review. And as long as both teams keep up the review speeds, and we don't anticipate the impact of the review schedule. And then Raymond, does that include also the asked out the high method validation here for the dipeia? I know that was a recent addition to scope just a couple days ago. But yeah, so we, we, I think the. Yeah, I think it's all been initiated here.

说话人 5 00:18:15

Now. Should matter the execution, the timeline, such, yes, that should be fine. So, so as long as the protocol proof and executed within a couple days and the report will be heading to the next

reviews. So I don't anticipate any issues for that.

说话人 4 00:18:35

I think we could achieve a monster. The L2 step 1 methods are now approved. So L3 step 1 are on track to approve. I don't have any concerns with step 1 methods. I think we need to progress those. Did you mention any additional work? Yeah, file type. Yeah, it's our drop in request, but we will need to progress them.

说话人 1 00:19:02

And I know there was, Steve, correct me here. There's any question over.

说话人 4 00:19:08

feasibility level。 it needs。

说话人 6 00:19:16

Yeah, and again, on that note as well that we've highlighted the framework of the capital planning there for the implementing curiosity remediation. Again, I think part of the big challenge, and we've covered a bit here in the discussion, is just how do we operationalize all of these elements across those three levers. I think that'll be, yeah, maybe the most great limiting factor here, of course, to SPPS, pbpq start. So again, if we can, you know, continue to emphasize, push that as best possible, and of course, we'll, I think.

说话人 1 00:19:49

这是很麻烦的。

说话人 2 00:19:53

And Steve, I know you've flagged us on the pre ppc, pre PPC leads for.

说话人 1 00:20:00

刚才那个剧情就是。在NT1上。

说话人 6 00:20:03

Right, so that's another additional run. Alright, yeah, correct. That plan, assuming that remains in place, would be the pre p P Q execution prior to the subsequent three batch P P Q. Again, we'll talk a bit further through those details in the overall assessment, but that's the current thought.

说话人 5 00:20:24

Understood. Let's make it a long sentence. Thanks.

说话人 1 00:20:30

直接带取好货，或者就是自动的投料，或者投200米超过那个。

说话人 4 00:20:35

I think one suggestion we would have in terms of feedback from the let's go team making good progress, we haven't had any always in the past two weeks for our projects. So that's still very positive.

说话人 4 00:20:49

I think the group cause investigation, we're still finding, taking a lot of efforts. So it might be worth just relooking at. Repose investigation and the folks that are reviewing those, we're still seeing issues coming through on those documents. So renewed focus on making sure those are.

说话人 6 00:21:17

Me one of the item do 1,2 balance check. Okay.

说话人 1 00:21:23

你们这什么事啊？反反复复，违章。

说话人 6 00:21:26

And didn't want to acknowledge that we had our engineers, Mark Lada and Andrew Moit, on site this week, you know, for a number of different activities, most notably, you know, fill verification following some of the VOA gap remediation work in the UG 9,1,7 purification process. Most notably, again, I appreciate the one helping host those individuals. And to, you know, from what we've seen so far, a lot of work has been done over the last few weeks to remediate that equipment set in the facility accordingly, so.

说话人 5 00:21:56

They will have to, of course, debrief with Mark and Andrew. But again, do appreciate the, all the work to put in the, that we want acknowledge there also. Thank you so much to see Mark and Eddie and even Peter, which took his whole week with us and which help us and us. I think it's so

face to face communications and which is was very productive. So thank you so much. Appreciate it.

说话人 1 00:22:26

去去行为观察访谈，就是去问员工。

说话人 4 00:22:31

Anyone have any other comments or questions?

说话人 1 00:22:33

安全生产会也去做，这个安全管理会。都是要很注重。

说话人 6 00:22:40

Nothing else for me.I just think we have our next fortnightly meeting here two Fridays from now.So we'll keep that on schedule.Any issues with that timing or whatnot, please let me know.We can adjust it.Yeah, no, but so far I think this time will for many about two minutes. So I think we keep this.

说话人 4 00:22:59

And again, we wanna focus on, on the most critical topics, respect for everybody time, everything is also more productive that way.Could I ask that we add our senior VP QA?I just realized he's not in the invite list and we're forwarding it to him, but he can't get in. So it's Jillian.

说话人 2 00:23:31

Okay.If no other question, then we wrap this up early and then we give everybody back 30 minute of your times.And then I see we see Shirley on Monday, actually.There's a dinner on Sunday, right?So see something.Thank you all.Thank you guys.Thank you guys. Thank you guys. Thank you guys. Yeah.

说话人 1 00:23:57

我觉得这个是最满意的，到目前为止。然后在天津三和天津四的研发这块的，你这个事。
